Tender Opportunity for CNC True Hole Technology Plasma Cutting Machine

Folbigg Fabrications Ltd is an established sheet metal and fabrication company trading for the past 35 years in Hereford supplying and fabricating parts, products and services to local and national companies in the food and drinks industry, building and construction, utility companies and the military.

We are looking for a competitive quote to supply a new high definition True Hole technology plasma cutting machine to the following specification:

1. Bed size 3500x1500mm
2. High definition cutting plasma
3. Must have True Hole technology
4. This machine to be capable of piercing and cutting 40mm plate
5. Cutting speed based on 10mm plate of approximately 3000mm per minute
6. To be supplied with Procut software, drawing and nesting package
7. Automated four gas mixing facilities for ferrous and non-automated mixing and cutting
8. Automated height detection and collision sensor
9. Power source Hypertherm XPR300

Suppliers are invited to provide quotes for this machine or similar however it must have True Hole technology.

Time Scale

We would require an intention to quote within 14 days from the start of the advertisement.
